SUMMARY

A Bachelor's degree holder in Information Technology Engineering from UIN Sunan Gunung Djati Bandung, specializing in Fullstack Web Development. With a strong foundation in building scalable and robust web applications, I bring hands-on experience from working with PTIPD UIN Sunan Gunung Djati Bandung and multiple impactful freelance projects. Driven by challenges, I excel in solving complex problems through innovative solutions and am committed to continual learning in the dynamic tech landscape. I focus on delivering high-quality, user-centered solutions, leveraging my expertise across various technologies and frameworks.

WORK EXPERIENCE

Fullstack Development   Jun 2021 – Dec 2021

Pusat Teknologi Informasi dan Pangkalan Data (PTIPD) Universitas Islam Negeri Sunan Gunung Djati Bandung |

Bandung

As a Fullstack Developer, I was fully responsible for the design, development, and maintenance of various website

projects, including:

- Online Thesis Guidance System
- New Student Registration System at UIN Sunan Gunung Djati
- Paper Bank at UIN Sunan Gunung Djati
- UIN Sunan Gunung Djati Partnership System
- PTIPD UIN Sunan Gunung Djati Profile Website

In this role, I also collaborated with cross-departmental teams to ensure that the projects progressed according to the

objectives set by the stakeholders.

FREELANCE PROJECT

Online Ceramic Store Website   Aug 2024 – Sep 2024

Developed an e-commerce website for a ceramic store featuring product management, shopping cart, online payment integration, and inventory management system. Responsible for both frontend and backend development.

Alodia Perfume Ordering Application   May 2024 – Jun 2024

Built and managed the backend system for the e-commerce application, including product management, transactions, and payment API integration.

Online Gallon Water Depot Ordering Website   Jan 2024 – Feb 2024

Developed an online ordering platform for a gallon water depot that allows customers to place orders, track orders, and manage deliveries. Features included payment integration and delivery management.

LTQ Markaz Learning Management System Website   Oct 2023 – Dec 2023

Created a learning management system (LMS) that supports user registration, course management, and payment integration. Focused on backend architecture, database management, and user authentication.
